## Kunkka dota 2 guide online

Kunkka dota 2 wiki. Kunkka dota 2. Dota 2 kunkka build.

It can grow quickly and safely with Torrent and Tidebringer. Magic Stick is useful for all heroes. Getting a good Tidebringer hunt can potentially kill enemy heroes in one attack if Kunkka has enough damage. Black King Bar is useful both to increase the survival and exit of damage of Kunkka, especially in situations where the enemy is trying to block Kunkka down to prevent him from throwing his spells. Items[] Departure elements: Clarity is very useful on Kunkka as its spells are all very mana-costly. Torrent can lift the neutral strip over the spawn box of their field, allowing Kunkka to easily stack a field from a distance with adequate timing. With his Tidebringer, Kunkka can face a good deal of damage to a large area in front of him. Ghostship is a large area magic nuke that treats significant damage in its impact area and allied buffs that passes through the road. Be careful that Torrent Storms is visible to enemies. To compliment his extended tile area, Kunkka wants elements that will amplify the damage of his right clicks. Torrent can be more easily landed if X Marks the Spot is used before. It's especially useful if you always focus on team battles. Ability Builds[] 12345678910111213141516182025 123456789101112131516182025 Talents[]3] Kunkka's skills work better when the enemy team is embossed together. You can also simply throw it from the outside of the Kunkka range to make it move in range and make sure the Phantom lands where you targeted it. However, it lasts for full 4 seconds at all levels so you can throw the spell will give your team a great deal of time to set up for the return. Tidebringer is a castable attack modifier that'lln Kunkka to inflict damage in a large area in front of him, giving him a bonus of damage with every strike. From the middle, Kunkka should focus on getting the first levels and harassing half of the enemy with Tidebringer, then use his spells to get early kills and harvitate his main objects. He can X himself and then bang the eyelids, throwing any spell or attacking with Tidebringer and then returning to safety. Used alone, Kunkka can immediately position itself in the best position from which to split the enemy or jump away to throw X on an enemy during an initiation. This allows allies to absorb up to double the normal amount of damage and still survive, making it extremely powerful on tanky heroes that are already very resistant to damage. Tidebringer Cleave can inflict damage on a large area. The object's activity can be used to heal yourself or teammates or add more damage to a gank. If played as a carry, Kunkka mainly depends on the Tidebringer to spread high amounts of damage on a large area. A useful way to evaluate X times marks the point is to use tertine from the sound effect of spell. Angled correctly, you can hit enemies through the mist of war and even for invisibility, making it a powerful ability to kill the enemies on the run who are short of health. Once again, remember that the target is returned with a delay of 0.4 seconds due to the animation of the cast of Kunkka, so also to be aware. Battle Fury increases Tidebringer's split rate, adding a split that can be used while Tidebringer is in recovery time. Assault cury reduces enemy armor, allowing you and your allies to inflict more damage, while at the same time giving an armor and an increase inof attack. The distance to which the boat appears and strikes can be seen in the balance on the ability and noting the circle of the ray. X marks the point contrasts the enemy heroes with great mobility, since the ability drags them back after getting away and their abilities are turned on onssop onrotir id otunp la aasetta ni ioizatilibasid lautneve id ipmet i ehc onepas –Assoc ,omisetcnaci' led atarud alled odnoces nu anges etnedecsa attelpirt ingO ,icisif innad ortnoc aznevivvvarpos alla otaccna onnad ehclauq akknuk a erad rep elitu Á ,otnel e otnemidrots anu id enoizacilpaa' emoc –Ásoc ,itaredom innad attart tnerroT ,akknuk ozzem emoc otusiqa' rep elibamusnoc elitu nu "Á ocoful li emaF ,atelec artsov id enoizerid allen onnad li erzahc id enif la ,ortuen opmac nu ad onu ehcna o ,eraicsirts ocimen onciv nu erasu oilgem' E ,amirp enoizantsed id aera'1 eratornffa rep erarig Árvod non otnaug ni ,ecolev "Aip' op nu omisetnaci'1 erenetto id akknuk a ehcna ettemrep otseuQ ,orucis odom ni isravella id akknuk id Áticapac al errudir "Áup e aicsirts id adno'1 eregnips ehcna am ,ammag ad orucis odom ni aisroc id oirasrevva nu eratselom rep odom nouh nu "Á enal-ni etnemetteuqerf regnirbediT odnazzilitU ,etnairvrou id Átinutroppe'nu eregnos ebbervod elibinopsis etnematornfa as ehc odom ni e occatta id eretop ous li eracersp non ad odom ni ,elibissop ehc atlov ingo regnirbediT etnemlaunam eraical id eracrec ,enoizaizin'1 etnarud itatilibasid onos es orucis onrotir id odotem nu orol Ád ,itaella ilgus otasU ,eataic id onnad noc ardaugs id ingampmoc orol i o orol eriploc rep eloveravf enoizisop anu id eraravonam id tov rep ognul a aznatsabba ocimen nu eracolb rep otazzilitu erese "Áup tnerroT ,regnirbediT noc otanibmoç ,ognul a aznatsabba aunitnoc ocog li es yrzac-imes anu ni erassap elibissop ehcna Á ,asercpos id otneleme'1 o allof alled ollortnoc id Átitnaug ednary anu edehcir omisetnaci'1 erarretta ehc acifingis odratir ognul ous li ,erltonl ,occurt otseuq id osu eraf rep erropsartelet a erazinil id amirp ossets es us X eraical eved' akknuk ,adapc aus alled hasals olos nu noc icimen iore "Aip eredicu etnemlaizetop "Áup akknuk ,regnirbediT a otaccna alluc anu scorp id e olla aznatsabba "Á onnad ous li eS "Á Á ,redael nuts onu o enoisiverp anoub anU ,atatalavotts eresse iam ebbervod non escinrof ehc anua'1 , Átiliba e imisetnaci irtsov i noc aignemis id acanam etrneM ,ilbarenluvni etaella Átinu orteiidi erarif "Áup non topS eht skraM X ,enoiznetTA ,ovitsempe odom ni orteiidi icimen i erarif id akknuk a to land it correctly. Since X marks the top east range of point to level 4 corresponds exactly to the impact distance of Ghostship, the two spells work very well together. Ideally, Kunkka wants to hit his main goal with the Tidebringer neckline instead of directly, as his split inflicts further physical damage. Divine Rapier is highly situational and very risky, but extremely powerful in the hands of Kunkka. Inflicting X on the enemy and then throwing torrents at that point, you can force the enemy to return just before the torrent completes. Also remember to go back and throw the spell if the target is marked at a closer distance. Silver Edge adds more strength to Kunkka, giving more attack damage and a slow proc potential of an attack. Drum of Endurance offers Kunkka attributes and bonus motion speed. X marks the place has a very short cast range at level 1, making it difficult to land on an enemy during a gank. Ghostship will always appear a specific distance behind Kunkka and will end a specific distance in front of Kunkka, employing a specific time period to do so. On Kunkka, it can help relieve her mana problems by giving him some Rígen Mana for launching her spells. If your team fails to finish the fight in 10 seconds and enemy teams have skills such as Doom or Poison Nova, consider retiring after or even before the rum buff dissipated. In general, the transport of kunkka can be placed in half or in the safe lane. Late: Shadow Blade allows him to inflict further damage to the entire enemy team if combined with Tidebringer. The bottle is actually mandatory if Kunkka must be played halfway. The magic wand is powerful for all the same reasons as Magic Stick, giving theto burst and restore mana to launch any of its spells. Articles like Armet of Mordiggian or Dadaulus make Kunkka a force not to be underestimated. Allies with rum buff will suffer half damage from all sources of enemy damagePoke tells as seen for yatuaung sancuocan suban yock 44 44 40-40) is 40-40. Early game: Speed boots are important on all heroes, but it can be very important on Kunkka to get in position to launch X Marks the Spot on enemies at initial levels. Heart of Tarrasque provides a lot of health and extra regeneration, and helps Kunkka recover from fighting almost immediately. X Marks the Spot lasts twice as long on allies. In this role, use X Marks the Spot to capture enemies on the run, and Ghostship as a form of initiation. However, mind the range of jets of X Marks the Spot, as it is very low at initial levels, and be sure that your timing is perfect otherwise the enemy can arrive after the stream or have time to escape after the return. Aghanim's scettro adds a new skill: Torrent Storm interrupting enemies during team fights with its powerful stunnel and slowing down, Tidebringer does not work against wards and buildings, and leaving it on autocast can cause proc before it is necessary. The Break component of Silver Edge can make it easier to kill some enemy heroes, such as Phantom Assassin, Spectre or Bristleback. As Torrent, Ghostship can benefit from being set with X Marks the Spot in order to block an enemy before throwing. On the contrary, however, it is also a good lane pusher when playing in half, as it can force the enemy half to retreat to their tower when the runes laid, allowing Kunkka and his team to control more easily the rune spots. Mid game: Phase Boots give him a bonus attack with which it can last more easily, as well as increase Tidebringer's effectiveness. Kunkka is a strategic fighteron its ability carefully positioned to stop enemy formations. Ghostship is incredibly good for team battles, even if there is a long delay that makes it difficult to land.
